

CONTAMINATION CONTROL for shoes & wheels

Food & Beverage

Dycem protects critical environments within the **Food & Beverage** industry across the world.

Our polymeric contamination control mats are a **dry and easy to use solution**, proven to attract and retain up to **99.9% of floor level** and up to **75% of airborne particulates**. When installed at pedestrian and wheeled entrances to a controlled space or hygiene zone, contamination from microorganisms, allergens, or other foreign objects is prevented. Protection of your work, your products, and your people is our top priority!

Supporting Your Industry

with improved contamination control

SUPERIOR PERFORMANCE in attracting, collecting, and retaining particles

SUSTAINABILITY and significant reduction in plastic waste over a 3+ year lifespan

QUALITY & COMPLIANCE commitment by meeting industry and international standards

up to **99%** floor level control

OUR PRODUCTS

Dycem® CleanZone

For pedestrian shoes & light wheeled traffic

Dycem® WorkZone

For wheels of heavy carts, pallet jacks, & forklift traffic

WHERE TO USE

- cGMP controlled areas
- Pedestrian entry to production
- Hygiene transition zones
- Outside communal areas
- Material & product transfer areas
- Microbial sensitive areas
- Between production lines
- Packaging areas

SUCCESS STORIES IN YOUR INDUSTRY

“

“In our previous facility we used sanitizing foot baths. These mats were a challenge as they were messy, hard to clean, and staff tried to step over them to avoid getting their shoes wet. We also tried sticky mats but found they were annoying to use. We are impressed by how good Dycem looks... the ease of cleaning is also a plus.”

-Managing Director,
Biohawk

“

“The result (of installation) was a noticeable improvement in the capture and removal of light debris from shoes in a contained area on the Dycem flooring.”

-Site Compliance Manager,
Mindful Chef
