

CONTAMINATION CONTROL for shoes & wheels

Healthcare

Dycem protects critical **Healthcare** environments across the world.

Our polymeric contamination control mats are proven to attract and retain up to **99.9% of floor level** and up to **75% of airborne particulates**. When installed at pedestrian and wheeled entrances and exits to labs, surgical suites, aseptic processing, or compounding pharmacies, the risk of potentially harmful contaminants entering or exiting is prevented. Protection of your work and the people who do it is our top priority!

Supporting Your Industry

with improved contamination control

- ✓ Entry & exits to surgical suites
- ✓ Hygiene transition zones
- ✓ Entrances to cleanrooms
- ✓ Sterile & Aseptic processing areas
- ✓ Blood banks & testing labs
- ✓ Critical care areas
- ✓ cGMP controlled spaces

SUCCESS STORIES IN YOUR INDUSTRY

“

“We have used Dycem for many years in our aseptic processing areas. We use it in transfer hatches (for wheels) and at entrances & exits to restrict the outside micro-organisms from getting into the facility.”

-Kings College Hospital

“

“We are very satisfied. It is a great product that keeps all of our areas cleaner...the mats are also aesthetically pleasing and look professional. We see the most benefits in receiving due to the amount of dirt controlled from the wheels of our large carts of goods.”
