

CONTAMINATION CONTROL for shoes & wheels

Medical Device

Dycem protects critical environments within the **Medical Device** industry globally.

Our polymeric contamination control mats are proven to attract and retain up to **99.9% of floor level** and up to **75% of airborne particulates**. When installed at pedestrian and wheeled entrances to a controlled space or cleanroom, the risk of potentially harmful contaminants entering your critical environment is prevented. Protecting your work, your products, and your people is our top priority!

Supporting Your Industry with improved contamination control

SUPERIOR PERFORMANCE in attracting, collecting, and retaining particles

CUSTOMIZED SOLUTIONS tailored to meet the needs of each facility and provide optimal results

ANTIMICROBIAL PROTECTION 24/7 with BioMaster silver ion additive

EASY CLEANING routine incorporated into existing SOP's with minimal downtime

EFFICIENCY by requiring minimal training, processes, or additional time for use

SUSTAINABILITY and significant reduction in plastic waste over a 3+ year lifespan

ESD PREVENTION through static dissipative properties of 10^8 ohm

up to **99%**
floor level control

OUR PRODUCTS

Dycem® CleanZone

For pedestrian shoes & light wheeled traffic

Dycem® WorkZone

For wheels of heavy carts, pallet jacks, & forklift traffic

WHERE TO USE

- ✓ cGMP controlled areas
- ✓ Gowning rooms & airshowers
- ✓ Pedestrian & material airlocks
- ✓ Entrances to cleanrooms
- ✓ Material & product transfer areas
- ✓ ESD sensitive areas
- ✓ In between processes or products
- ✓ Packaging areas

SUCCESS STORIES IN YOUR INDUSTRY

“

“The entire Dycem team we worked with was professional, quick to respond, and very flexible and supportive. We have enjoyed our product so far and look forward to reduced particulate issues within our Cleanroom due to the effectiveness of the Dycem mats we installed!”

–Senior Manufacturing Engineer, Stryker

“

“With Dycem, more dirt (was) prevented from entering the controlled environment and anterooms due to bigger coverage and capability of material catching more particulates. Huge cost savings.”

– Plant Engineer, Getinge
