

CONTAMINATION CONTROL for shoes & wheels

Pharmaceutical & Biotechnology

Dycem protects cleanrooms & critical environments within the **Pharmaceutical & Biotechnology** industry across the world.

Our polymeric contamination control mats are proven to attract and retain up to **99.9% of floor-level** and up to **75% of airborne particulates**. When installed at pedestrian and wheeled entrances to a controlled space or cleanroom, the risk of potentially harmful contaminants such as dirt, particulate matter, or microorganisms entering your critical environment is prevented. Protecting your work, products, and people is our top priority!

Supporting Your Industry

with improved contamination control

SUPERIOR PERFORMANCE in attracting, collecting, and retaining particles

CUSTOMIZED SOLUTIONS tailored to meet the needs of each facility and provide optimal results

ANTIMICROBIAL PROTECTION 24/7 with BioMaster silver ion additive

EASY CLEANING routine incorporated into existing SOP's with minimal downtime

EFFICIENCY by requiring minimal training, processes, or additional time for use

SUSTAINABILITY and significant reduction in plastic waste over a 3+ year lifespan

QUALITY & COMPLIANCE commitment by meeting industry and international standards

up to **99%**
floor level control

OUR PRODUCTS

Dycem® CleanZone

For pedestrian shoes & light wheeled traffic

Dycem® WorkZone

For wheels of heavy carts, pallet jacks, & forklift traffic

WHERE TO USE

- cGMP controlled areas
- Gowning rooms & airshowers
- Pedestrian & material airlocks
- Entrances to cleanrooms
- Material & product transfer areas
- Sterile & microbial sensitive areas
- In between processes or products
- Packaging areas

SUCCESS STORIES IN YOUR INDUSTRY

“

“The installation of Dycem has reduced floor contamination, and also the effort required and costs of maintaining cleanliness of the remaining production areas.”

-Takeda

“

“We have recognized that the Dycem zones work very well – confirmed by measurements made by the manufacturer’s representative – our powder remains in the zone and does not spread outside the production areas. I can only recommend the installation of Dycem zones – if you adhere to the rules for cleaning them, the effect is really noticeable.”

-Teva
